	900
	1000
	1100
	1200

shelves come in a range of finishes and custom sizing.

hanger bar w/ hook

drawers are available in 1, 2, 3 or 4 tiers with a range of finishes, soft close mechanism, secured on casters or between posts.

D	W
435	500
535 to 900	

Tier Height 160/240mm

edges
 All edges trimmed with aluminium profiles.

Wardrobes & Walk-ins

The perfect wardrobe is only a dream for most people. So often we are faced with a space that is little more than a couple of shelves and a pole to hang our precious garments.

With Ximula™ your dream wardrobe is available! What's more, it is not a fixed cabinet system that's unchangeable like most others; in fact your Ximula™ wardrobe is infinitely adjustable to suit your changing needs. You can alter the heights of the drawers and hanging rails by the millimeter or add another shelf when you need it, and there is a great choice of door systems available to compliment the room.

All we need to create the design for your new wardrobe is a few simple measurements and some basic information of your needs and we can send you your tailored design today.

Storage & Entertainment Solutions

The Ximula system offers unlimited design solutions for your storage and entertainment needs and cleverly adapts to your evolving lifestyle.

Choose from a large collection of cabinets and drawers or Ximula can customise a design solution to suit your needs at no extra cost.

The Ximula system works perfectly with today's technologies and has been tested to support heavy electronic components such as large format TVs or other bulky items with ease on its patented engineered post system.

Create the perfect home cinema experience, organise the office supplies, or efficiently store your home contents and precious DVD, CD and book collection with Ximula. It's truly a system with unlimited possibilities.

Shelving Systems

Do you require the perfect bookshelves for your home or apartment, or perhaps commercial shelving for your office? Maybe you require shop fittings for a bookshop, hair salon or fashion boutique? The Ximula™ system has the most extensive range of beautiful, sleek and contemporary shelving and fittings available.

The Ximula™ flexible system is a favoured choice of Architects and Designers for homes, commercial fit-outs and in public institutions such as libraries and galleries throughout Europe, America, Asia and Australia.

Office & Workspace Solutions

Whether you require a small home office for the family or commercial workstations for a company headquarters, Ximula™ can provide options to suit all applications.

For the home office or the kids study desk, Ximula has unlimited possibilities. A large range of desks, bookshelves, filing cabinets and drawer units easily attach to the patented engineered post system which allows you to add components and alter the design as your family needs grow and change.

Commercial workstations require different specifications to suit a busy environment. Privacy screens and cable management systems along with mobile pedestals and library shelving are all catered for by the Ximula™ flexible system.

green credentials

Ximula has embraced the responsibility to respect and protect our planet by setting strict environmental standards in its manufacturing process that minimises waste and emissions that are harmful to our planet.

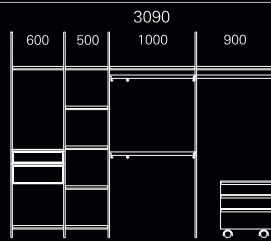

By using environmentally sustainable materials and understanding the benefits that recycling has from a whole of product life perspective, Ximula has successfully developed an environmentally sound product range that is both beautiful to enjoy but more importantly is friendly to our future. Ximula believes being 'Green' makes good sense because everybody benefits from it.

- Ximula's Aluminium profiles offer the 'cradle to cradle' advantage that it can be repeatedly and efficiently recycled without any loss of quality.
- Aluminium is considered the 'greenest' of metals.
- Ximula anodising does not require the use of solvents nor volatile organic compounds (VOC's) and no heavy metals are involved in the process.
- Ximula uses sustainable MEICO MFC particleboard which has gained certification to international best practice standards including CARB (US market) and has attained the prestigious BS EN ISO 14001: 1996 Environmental Management System accredited by Lloyd's Register Quality Assurance.
- MFC particleboard is manufactured from sustainable plantations of rubber trees, acacia wood and light tropical hardwoods.
- The process uses environmentally friendly resins and is free from harmful chemicals like Toluene, Xylene, Ethyl Benzene or styrene.
- The material has been independently tested in Singapore to confirm that no trace of volatile organic compounds Formaldehyde, Phenyl cyclohexene or Phthalate were detected.
